01 EXPERIENCE

Senior Frontend Engineer Cleo Jan 2024–Present

Worked in the Financial Assistant pillar building the core chat experience and other features to help users build healthier financial habits.

Founding Software Engineer Hyphen Mar–Dec 2023

Built a greenfield interactive e-learning platform for early career talent. Solely responsible for the frontend architecture and design system.

Senior/Lead Frontend Engineer Atellio 2021–2023

Built resource and project management software for creative teams as part of a small delivery team, at first as an IC and later as the frontend lead.

Senior Frontend Engineer Filament AI 2017–2021

Built highly customisable AI-powered financial knowledge management dashboards in both a product and solutions capacity.

Frontend Engineer Repositive 2015–2017

Joined as a junior web developer and moved into a mid-level frontend role. Helped build a search platform for genomic research data with complex filtering.
